

Orga Work

THE SMART UNDERMOUNT DRAWER

**FOR ALL
WORKSURFACES**

OrgaWork

THE SMART UNDERMOUNT DRAWER FOR ALL WORKSURFACES

A MUST FOR THE MODERN OFFICE

Digitalization has changed office work – and office environments have changed too. More and more documents are scanned and are available electronically to the entire company. This makes personal filing systems leaner and more space-saving.

The undermount drawer OrgaWork is the optimized space for storage of working materials, personal belongings and devices – safely secured, but ready at hand when you need them. OrgaWork can be fitted under table tops and reception counters or in cupboards. However, OrgaWork was primarily developed as a base drawer for height-adjustable desks.

HEALTHY WORKING

Height-adjustable desks experience a real boom. Back problems have now become the number 1 widespread disease in our country, causing almost 10% of all sick days. As a preventive measure, it is therefore recommended to alternate between sitting and standing when working. With OrgaWork, everything that should be readily available is always at hand height.

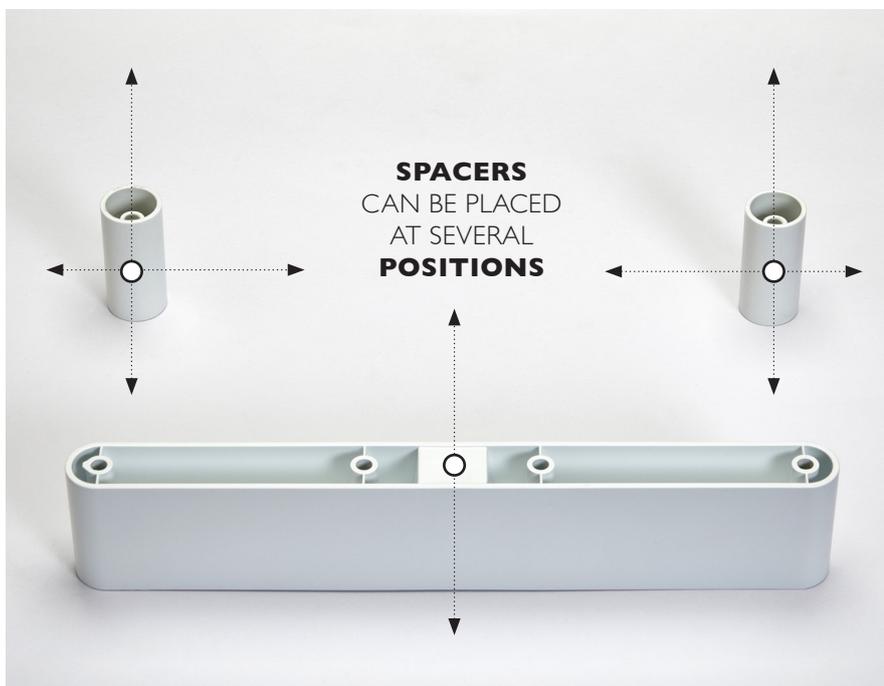

EASY TO FIT IN ALL SITUATIONS

The plastic undermount drawer can be screwed directly under the table-top. If the substructure of the table does not allow this, we offer a fixing for OrgaWork that is both innovative and clever: spacer sets consisting of strips and round sleeves. These spacers can be attached variably

THE FIRST UNDERMOUNT DRAWER THAT ALWAYS FITS

to the drawer housing and thus bridge any table frame up to 50 mm height, regardless of the position of the crossbars. OrgaWork is the first undermount drawer that always fits.

SMART IDEAS

A second clever idea can be found in the rotatable front panel of OrgaWork. It allows the lock to be positioned towards the outer edge of the desk at all times, thus avoiding the risk of injury from the key. OrgaWork can therefore be mounted universally on the left or right side of the user.

HIGH OPERATING COMFORT

The quality of a drawer is largely determined by its running properties when pulled out and pushed in. Concealed under the drawer shrouds, OrgaWork is equipped with full extension slides that make the useful space of the drawer completely accessible. The integrated soft-close damping system and the buffered end stop ensure a particularly high level of operating comfort.

The rubber-like bottom of the 2-component drawer has a sound-absorbing and anti-slip effect. It ensures that when you open the drawer you find everything exactly where you put it.

OrgaWork

PERFECTION

AND VARIABILITY, DOWN TO THE SMALLEST DETAIL

CONTENT SECURED

It is not possible to disassemble the drawer unit when it is locked, as the fixing screws are only accessible when the drawer is open. You can therefore lock up your notebook, smartphone or other personal belongings without hesitation and always keep them ready to hand and safe at the same time.

EXPANDABLE

OrgaWork is expandable, so that you can mount several drawers one below the other depending on the space required. Whether „doubled“ or as a single unit: thanks to its understated design, OrgaWork harmonizes perfectly with any office furniture.

**ALSO AVAILABLE
IN BLACK COLOR**

YOUR ADVANTAGES

- fits under any worksurface thanks to an innovative mounting system
- spacer sets consisting of strips and sleeves (each 53 mm high) and matching screws are available separately
- rotatable front panel for left and right lock positioning
- rounded edges
- non-slipping drawer bottom
- lockable
- theft-proof installation
- full extension slides with soft-close damping system
- easy-care, scratch-resistant surfaces
- available in several colors
- external dimensions drawer unit: 430x410x70mm (WxDxH)
- internal dimensions drawer: 305x345x40mm (WxDxH)
