

# *Sliding doors*

---

With **Domino** Formenti & Giovenzana is adding another opening alternative for cabinet doors to their range. The focus on the development was on the quality of the solution, whilst keeping cost in mind. A sliding door range with state-of-the-art features at an affordable price is completing the offering of hinges and lifters covering already door applications. A full range of applications for two and three sliding door system. The SlowMotion damping device is kept in a very compact un-intrusive housing and confers showroom effect and quality feel to every wardrobe.

## *Full range*

Domino, like the famous block who gave its name, is a complete range of solutions. Domino exists for two or three door applications. Domino exists for different door thicknesses from light to heavy. Different profiles and all surrounding components complete the Domino offering.

## *Affordable quality components*

FGV are proposing a state-of-the-art family of hardware solutions for furniture sliding doors. Materials and components are chosen to deliver perfect function at an affordable price. High volume manufacturing and stringent quality processes will guarantee perfect function.

## *Safety and ease of assembly*

The different components of the system are easy to assemble and safety stops and anti-lift features are integral part of the design. The choice of materials and the technologies used for assembly of the parts guarantee high safety for the whole life of your wardrobes and closets.

## *SlowMotion damping system*

A distinctive feature will surely be the brand new damping solution developed by FGV specifically for this application. Extremely slim in its design and very little intrusive, the housing bears a powerful damper with a long stroke and an excellent control of the door movement, increasing day to day comfort. The very competitive SlowMotion damping really makes the difference.
